Mining exploration entity or oil and gas exploration entity quarterly cash flow report

8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:

8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

The sale of concentrate produced in December was deferred until the first week of January 2021 reducing the cash inflow in Q4 2020 and increasing cashflow in Q1 2021. Additionally, December is a month of significantly increased labour costs (statutory and discretionary bonuses) and lower productivity (holidays and religious observances).

The Company's budget forecasts positive cashflow from operations during Q1 2021 and future quarters based on the anticipated mining rate, grade, recoveries and commodity prices.

8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

The Company has not taken, nor currently proposes to take, any steps to raise further cash to fund operations. However, operations and the refurbishment of the Plomosas processing plant may be impacted by pandemic control or other short-term cash constraints, so management assesses its cash management options on a continuous basis.

The Company's good relationship with its major shareholders and its corporate advisors gives management comfort that additional funding would be available if required.

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

The company expects to be able to continue its operations and meet its objectives for reasons outlined in the questions above.

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.
