

ANNUAL GENERAL MEETING PRESENTATION MAY 2021

IMPORTANT INFORMATION

FORWARD-LOOKING STATEMENTS AND INFORMATION

This report contains forward looking statements and forward-looking information, which are based on assumptions and judgments of management regarding future events and results. Such forward-looking statements and forward-looking information involve known and unknown risks, uncertainties, and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any anticipated future results, performance or achievements expressed or implied by such forward-looking statements. Such factors include, among others, the actual market prices of zinc and lead, the actual results of current exploration, the availability of debt and equity financing, the volatility in global financial markets, the actual results of future mining, processing and development activities, receipt of regulatory approvals as and when required and changes in project parameters as plans continue to be evaluated.

Except as required by law or regulation (including the ASX Listing Rules), Consolidated Zinc undertakes no obligation to provide any additional or updated information whether as a result of new information, future events or results or otherwise. Indications of, and guidance or outlook on, future earnings or financial position or performance are also forward-looking statements.

PRODUCTION TARGETS

Production targets referred to in this report are underpinned by estimated Mineral Resources which have been prepared by competent persons in accordance with the requirements of the JORC Code. The production targets in this report are sourced from both Indicated and Inferred Mineral Resources and it should be noted that there is a low geological confidence associated with Inferred Mineral Resources and there is no certainty that further exploration work will result in the determination of Indicated Mineral Resources or that the production target will be realised.

There is a low level of geological confidence associated with Inferred Mineral Resources and there is no certainty that further exploration work will result in the determination of indicated mineral resources or that the production target itself will be realised. The stated production target is based on the Company's current expectations of future results or events and should not be solely relied upon by investors when making investment decisions. Further evaluation work and appropriate studies are required to establish sufficient confidence that this target will be met.

COMPETENT PERSONS' STATEMENT

The information in this report that relates to exploration results, data collection and geological interpretation is based on information compiled by Mr Bradley Marwood BASc, FAusIMM.

Mr Marwood has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity that is being undertaken to qualify as Competent Person as defined in the 2012 edition of the 'Australasian Code for Reporting of Exploration Results, Minerals Resources and Ore Reserves' (JORC Code). Mr Marwood consents to the inclusion in this report of the matters based on their information in the form and context in which it appears.

The information in this report that relates to the Mineral Resources were first reported by the Company in compliance with JORC 2012 in market release dated 29 April 2020.

The Company confirms that it is not aware of any new information or data that materially affects the information included in the market announcements referred to above and further confirms that all material assumptions and technical parameters underpinning the ore reserve and mineral resource estimates contained in those market releases continue to apply and have not materially changed.

CZL CORPORATE OVERVIEW

CAPITAL STRUCTURE

Share price	A\$0.042
Market Capitalisation	A\$12.3M
Shares on Issue	293,857,802
Quoted Options on Issue	68,118,999
Unquoted Options/Performance Rights	7,783,331
Cash, Receivables & Inventory (31/3/2021)	US\$3.8M
Debt (31/3/2021)	US\$0.1M

SUBSTANTIAL SHAREHOLDERS

Copulos Group	30%
Chris Retzos	7%

SHARE REGISTRY

Board/Management	1%
Other	99%

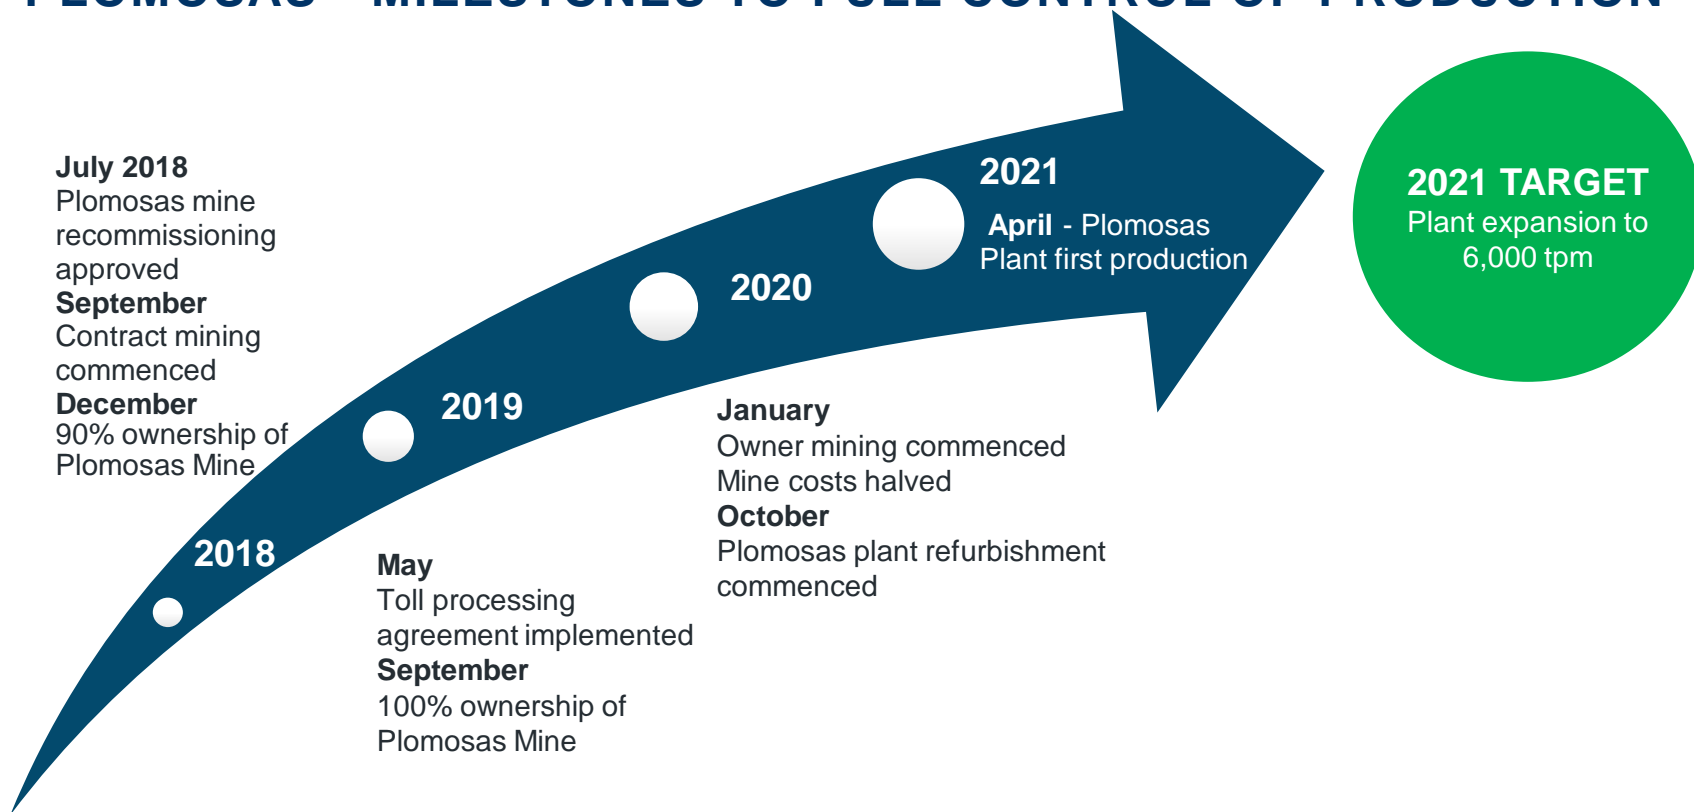

PLOMOSAS MINE, MEXICO

PLOMOSAS - MILESTONES TO FULL CONTROL OF PRODUCTION

PLOMOSAS PLANT REFURBISHMENT COMPLETED

- Plant refurbishment completed within budget
- First production: Thursday afternoon 14 April 2021
- Tailings storage facility operating as expected
- Plant consistently operating at or above 100tpd, production being ramped up

PLOMOSAS PLANT – OPERATING ABOVE DESIGN

- Plant commissioning 14 April to 30 April
- 30 April plant run at design production for 10 hours
- Constant mine water quality stabilises reagent consumption and plant performance
- Plomosas plant production will be stepped up on a weekly basis to establish the maximum throughput reliably achievable without further equipment installation
- Step testing will be used to scope the expansion requirements for the plant to operate at 200tpd

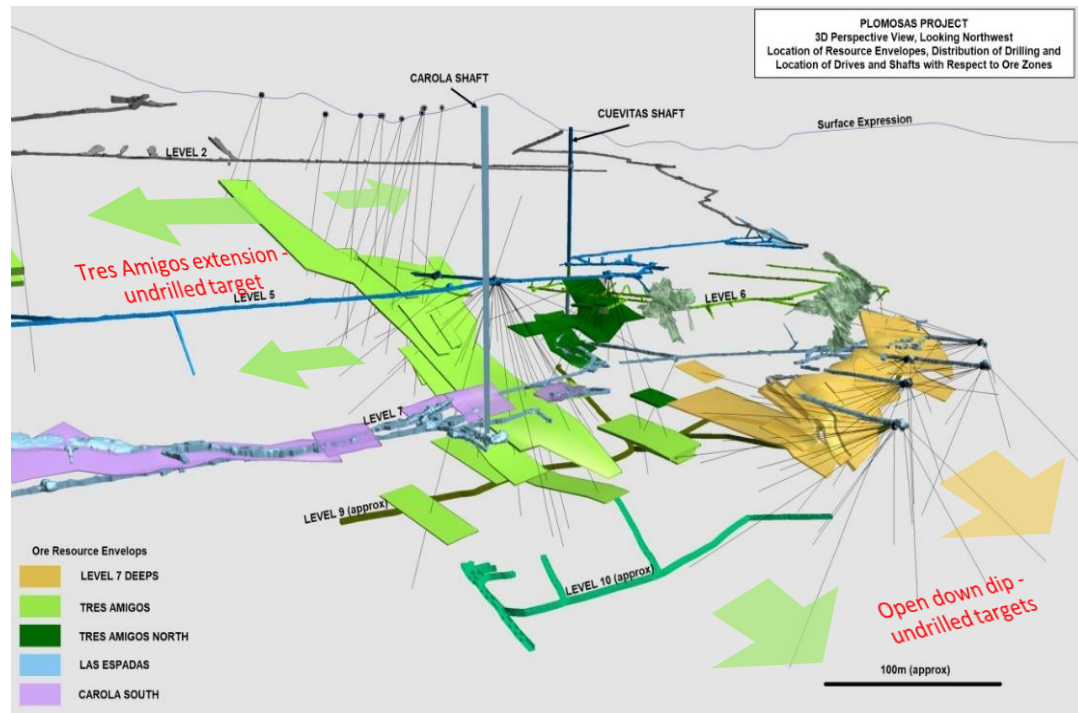

PLOMOSAS MINE OPERATIONS

- Current production rates average 100 tpd, targeting 200 tpd
- Current ore stockpiles exceed 3,000t (~US\$1.2M NRV), plan to reduce by end Q2, 2021
- Pumping rates set to reach target water level depth by November 2021
- Mine infrastructure renewed with new pumps to be installed, ventilation, services, offices and change house completed
- Purchase of updated key mobile mining equipment in progress

PLOMOSAS MINE PLANNING

L7

Depth extension to L10
Untested awaits dewatering
to access for resource definition
across the mineralised units

TA

Depth extension above L10
Mineralised block at +25% zinc
Requires drill testing
Targeted for mining 2022

CS

Down dip extension hosts a
Mineralised block at +22% zinc
pure sulphide
Targeted for mining 2022

LE

Structural review under way
may be along strike extension of TA
after major post depositional fault

EXPLORATION - BASE METAL AND GOLD

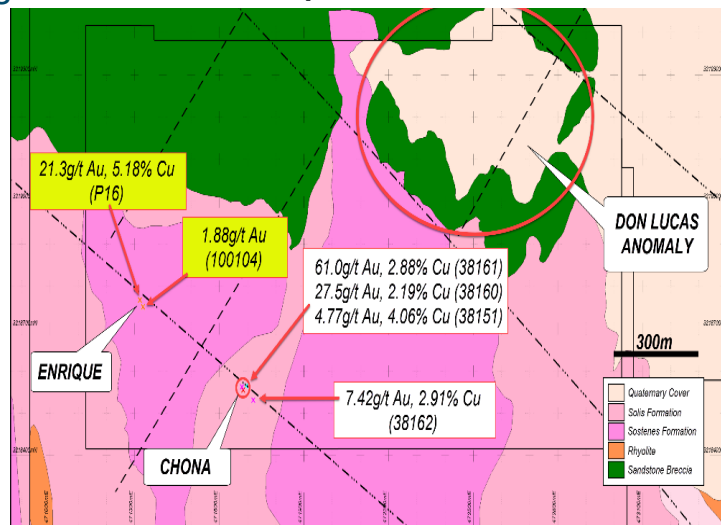

Base Metal Exploration

- Recent surface mapping has resulted in a rethink of the orientation of the base metals north of the current mineralised blocks
- Targets generated along strike and down dip
- Exploration planned for 2021 to replace depleted resources and test north extension

Gold Exploration

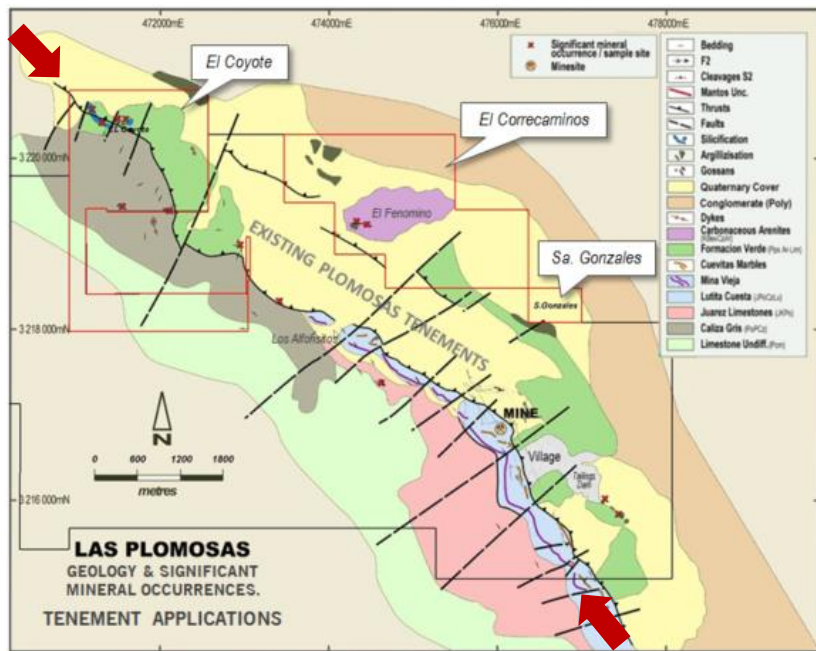

- Primary targets Enrique & Chona assays of surface grab samples returning no commercially economic results. The stopes will now be sampled prior to closing off the gold exploration potential at Plomosas.
